The Eerdmans Encyclopedia of Early Christian Art and Archaeology-Finney 2017 More than 400 distinguished scholars, including archaeologists, art historians, historians, epigraphers, and theologians, have written the 1,455 entries in this monumental encyclopaedia—the first comprehensive reference work of its kind. From Aachen to Zurzach, Paul Corby Finney’s three-volume masterwork draws on archaeological and epigraphic evidence to offer readers a basic orientation to early Christian architecture, sculpture, painting, mosaic, and portable artifacts created roughly between AD 200 and 600 in Africa, Asia, and Europe. Clear, comprehensive, and richly illustrated, this work will be an essential resource for all those interested in late antique and early Christian art, archaeology, and history.—The Oxford Handbook of Early Christian Archaeology-David K. Pettigrew 2019-01-21 "This handbook brings together work by leading scholars of the archaeology of early Christianity in the Mediterranean and surrounding regions. The 34 essays to this volume ground the history, culture, and society of the first seven centuries of Christianity in the latest currents of archaeological method, theory, and research."—The Eerdmans Encyclopedia of Early Christian Art and Archaeology-Finney 2017 More than 400 distinguished scholars, including archaeologists, art historians, historians, epigraphers, and theologians, have written the 1,455 entries in this monumental encyclopaedia—the first comprehensive reference work of its kind. Clear, comprehensive, and richly illustrated, this work will be an essential resource for all those interested in late antique and early Christian art, archaeology, and history.—Ante Pacem-Graydon F. Snyder 2003 Early Christianity emerged from obscurity to dominate the Roman world: that story, told and retold, continues to fascinate historians and believers. But the religion of ordinary Christians is not so well or easily known; they have left us no literary record of their faith and their hope, their marrying and their dying, their worship and their common life. Before the publication of “Ante Pacem there was no introduction or source-book for early Christian archaeology available in English. With his book Professor Snyder has performed an incalculable service for students of early Christianity and the world of late antiquity. He analyzes in one lavishly illustrated volume every piece of evidence that can, with some degree of assurance, be dated before the triumph of the emperor Constantine at the Milvian Bridge in 312CE thrust the nascent Christian culture “into a universal role as the formal religious expression of the Roman Empire.” The Oxford Handbook of Early Christian Archaeology-David K. A learned, brilliant and enjoyable study."—Géza Vermès, Times Literary Supplement In this exciting book, Paula Fredriksen explains the variety of New Testament images of Jesus by exploring the ways that the new Christian communities interpreted his message and in light of the delay of the kingdom he had preached. This edition includes an introduction reviews the most recent scholarship on Jesus and its implications for both history and theology. “Brilliant and lucidly written, full of original and fascinating insights.”—Regional H. Fuller, Journal of the American Academy of Religion "This is a first-rate work of a first-rate historian.”—James D. Tabor, Journal of Religion “Fredriksen confronts her documents—principally the writings of the New Testament—as an archaeologist would an especially rich complex site. With great care she distinguishes the literary images from historical fact. As she does so, she explains the images of Jesus in terms of the strategies and purposes of the writers Paul, Matthew, Mark, Luke, and John.”—Thomas D’Evelyn, Christian Science Monitor Ancient Jewish Art and Archaeology in the Diaspora-Rachel Hachlili 1998-03-31 This publication provides fascinating new information about the origin, symbolism and significance of ancient Jewish synagogal and funerary art and archaeology in the Diaspora, during the Hellenistic, Roman and Byzantine periods. The Invisible God-Paul Corby Finney 1994 They began to draw visible boundaries and commenced the complicated process of endowing their communities with the marks of ethnic and cultural distinction. Journal of the British Archaeological Association-British Archaeological Association 1902 Archaeology, the Rabbis, & Early Christianity-Eric M. Meyers 1981 "For the first time an accurate picture of rabbinic Judaism and Christian origins in Roman Palestine emerges as two active field archaeologists—one Jewish and the other Christian—integrate historical literature with current archaeological findings. Their unique blending of literary and nonliterary approaches to the past allows a more reliable reconstruction of this critical and formative era of Western civilization."—Back cover. Understanding Early Christian Art-Robin Margaret Jensen 2013-04-15 Understanding Early Christian Art is designed for students of both religion and of art history. It makes the critical tools of art historians accessible to students of religion, to help them understand better the visual representations of Christianity. It will also aid art historians in comprehending the complex theology, history and context of Christian art. This interdisciplinary and boundary-breaking approach will enable students in several fields to further their understanding and knowledge of the art of the early Christian era. Understanding Early Christian Art contains over fifty images with parallel text. The Ecclesiastical Review- 1911 The American Ecclesiastical Review-Herman Joseph Heuser 1911 God's Library-Brent Nongbri 2018-08-21 A provocative book from a highly original scholar, challenging much of what we know about early Christian manuscripts In this bold and groundbreaking book, Brent Nongbri provides an up-to-date introduction to the major collections of early Christian manuscripts and demonstrates that much of what we thought we knew about these books and fragments is mistaken. While biblical scholars have expended much effort in their study of the texts contained within our earliest Christian manuscripts, there has been a surprising lack of interest in thinking about these books as material objects with individual, unique histories. We have too often ignored the ways that the antiquities market obscures our knowledge of the origins of these manuscripts. Through painstaking archival research and detailed studies of our most important collections of early Christian manuscripts, Nongbri vividly shows how the earliest Christian books are more than just carriers of texts or samples of handwriting. They are three-dimensional archaeological artifacts with fascinating stories to tell, if we're willing to listen. Library of Congress Subject Headings-Library of Congress 1975 Archaeology and the New Testament-John McKay 2008-02-01 A veteran archaeologist sheds light on the biblical text by examining archaeological discoveries. Gender and Material Culture-Roberta Gilchrist 2013-05-13 Gender and Material Culture is the first complete study in the archaeology of gender, exploring the differences between the religious life of men and women. Gender in medieval monasticism influenced landscape contexts and strategies of economic management, the form and development of buildings and their symbolic and iconographic content. Women’s religious experience was often poorly documented, but their archaeology indicates a shared tradition which was closely linked with, and valued by local communities. The distinctive patterns observed suggest that gender is essential to archaeological analysis. The Archaeological Review- 1888

Art and Judaism in the Greco-Roman World—Steven Fine 2005-06-08 Publisher Description

Coptic Art and Archaeology—Alexander Badawy 1970 Professor Alexander Badawy has written and profoundly illustrated the works of Coptic art during his early Christian period following the Antique and ending with the assimilation of Coptic art into that of Islam. Coptic Art and Archaeology is based on extensive archaeological excavations and on researchers' accounts. In developing his thesis on the nature of the Coptic spirit in the arts, Professor Badawy—anarchaeologist and artist—has drawn upon his own firsthand observations plus a wealth of materials from museums all over the world. The result is a comprehensive examination of the Coptic arts. The text is illustrated with photographs of excavations in style with plans of excavated sites, and with the author's restored perspectives. It is a journey through the sites and discoveries that have confirmed and extended his knowledge of the Coptic civilization: a journey that included the architecture of houses and towns, fortified and fortified cities, palaces, mosaics, paintings, and sculpture in several media, textiles, ceramics, and illuminated manuscripts. All are described in painstaking detail and historical context by the author. Illustrations are key to the text, which in turn demonstrates that Coptic art was in many ways a "people's art"—not百分百 classified—not invariably associated with the changing fortunes of the Egyptian Christians, and this, too, is carefully traced and the examples are noted in the text and in illustrations. Professor Badawy concludes the book with a study of the effects of Coptic art on European artistic traditions. The remarkable comprehensiveness of this book will make it a basic tool of professional art historians and archaeologists, and it seems inevitable that the extensive and detailed descriptions of the extant works of Coptic artists will stimulate additional research into this area of art history. The professional and the student will find especially helpful the extensive footnotes, bibliography of international sources listed by subject area (e.g. Sculpture, Architecture, Painting), and the literally hundreds of illustrations that provide an unparalleled single-book source of examples of Coptic art. For those who cannot make the pilgrimage to the actual sites or visit the museum collections all over the world, Professor Badawy has provided the next best thing: a painstakingly detailed representative description of the treasures that are known. This is also a confirmation of the evidence of religious zeal in Coptic architecture and iconography, and an appreciation of the influences of history and politics on the art and culture of a people. The Zondervan Handbook of Biblical Archaeology—J. Randall Price 2017-11-28 The Zondervan Handbook of Biblical Archaeology is a reference resource for anyone interested in archaeology and its relevance to biblical, theological, and apologetic studies. Illustrated with full-color photos, charts, and maps, this handbook provides readers with a wealth of information on the artifacts and ruins that have given us a clearer understanding of what Jesus and his followers believed and how they lived. The Zondervan Handbook of Biblical Archaeology includes an introduction to the field of archaeology for readers who might not be familiar with the methods, practices, and importance of this area of study. Included in this section is an annotated bibliography of important biblical archaeological reports, books, and journal articles for further study. The rest of the handbook is devoted to a book-by-book (Genesis through Revelation) presentation of the most significant archaeological discoveries that enhance our understanding of the biblical text, including a section on the intertestamental period. A rich array of visual images including photos of excavations sites, coins, maps, artifacts, and historic structures allows readers to immerse themselves in the world of the Bible. This monumental work gives readers the opportunity to visit ancient sites and historical places while remaining in the comfort of their own home.

The Archaeological Record: Hats—Heteri—and Eberhard Sauer 2003 In March 2001 the world watched in disbelief as explosives of Al-Qaeda and the Taliban reduced the gigantic Buddha statues at Bamiyan to stone powder. Few realise that such religious zeal to ‘free’ the world from ‘pagan’ art follows an old tradition. What role did it play in transforming the colourful world of Roman paganism into medieval Christianity? All over the ancient world images have been found which bear deep scar marks from iconoclastic attacks. Beheaded statues and mutilated fragments of images, once the objects of veneration and awe, speak a language as clear as words. As Eberhard Sauer notes in his book, the sad memory of religious zeal is a clear indication of the process by which the image-haters form a powerful complement to eyewitness accounts. Archaeology helps us to understand one of the most radical changes in world history. Why was it that Christianity achieved sole domination in the West but remained a minority religion in much of Asia? Can the past help us to put the outrages of the present into context? The Upper Room and Tomb of David—David-Christian Clausen 2016-04-25 It has been a church, a mosque and a temple, now it is a museum. The Cenacle is illustrated with photographic reproductions of all the plans of excavated sites, and with the author’s restored perspectives. It is a journey through the sites and discoveries that have confirmed and extended his knowledge of the Coptic civilization: a journey that included the architecture of houses and towns, fortified and fortified cities, palaces, mosaics, paintings, and sculpture in several media, textiles, ceramics, and illuminated manuscripts. All are described in painstaking detail and historical context by the author. Illustrations are key to the text, which in turn demonstrates that Coptic art was in many ways a “people’s art” and not an upper-class art—beginning with the dawn of human civilization and ending with present day and the future of archaeology, chronic hundreds of sites and artifacts found in Sumer, Babylonia, the Second Temple, along the route of the Exodus, and in many other regions across the Middle East. Timelines bridge hundreds of years and several empires, giving readers a visual sense of location, while hundreds of photos and illustrations of rare artifacts and ancient places add to the visual splendor. It concludes with details of what remains to be found and the evolving dynamic of biblical faith in an increasingly scientific world in which archaeologists make daily breakthroughs. The Jesus Discovery—James D. Tabor 2013-02-19 Discusses a recent archaeological discovery in Jerusalem that the authors claim is the earliest evidence of the resurrection of Christ, and reopening the historical discussion about the family tomb of Jesus. Coming Out Christian in the Roman World—Douglas Ryan Boin 2015-03-03 The sudden collapse of Roman civilization ushered in a movement more than 1,500 years later that we now know as the notion that a fledgling religion, Christianity, went from a persecuted fringe movement to an irresistible force that toppled the empire. The “intolerant zeal” of Christians, wrote Edward Gibbon, swept Rome’s old gods away, and with them the structures that sustained Roman society. Not so, argues Douglas Boin. Such tales are simply untrue to history, and ignore the most important fact of all: in life Rome never came to a dramatic stop. Instead, as Boin shows, a small but growing Christian community, historically, religiously, and culturally in a gradual process, one that happened in fits and starts over centuries. Drawing upon a decade of recent studies in history and archaeology, and on his own research, Boin opens up a wholly new window onto a period we thought we knew. His work is the first to describe how Christians navigated the complex world of social identity in terms of “passing” and “coming out.” Many Christians lived in a dynamic middle ground. Their quiet success, as much as the clamor of martyrdom, was a powerful agent for change. With this insightful approach to the story of Christians in the Roman world, Douglas Boin rewrites, and rediscover, the fascinating early history of a world faith.

Archaeology of the Bible—Jean-Pierre Isbouts 2016 From ancient holy sites, to buried relics and treasures, National Geographic uncovers the history and the archaeological discoveries from Scripture and the biblical world. Richly illustrated and written from an objective and non-denominational perspective, author Jean-Pierre Isbouts uses the latest scientific and archaeological discoveries to place biblical stories in the framework of human history. Chronicles of a new art—ending with the dawn of human civilization and ending with present day and the future of archaeology, chronic hundreds of sites and artifacts found in Sumer, Babylonia, the Second Temple, along the route of the Exodus, and in many other regions across the Middle East.
